

ANTHONY CASTELLON

WEB DEVELOPER

ABOUT ME :

I am a junior backend developer passionate about creating practical software solutions. I have experience with Python, Flask, FastAPI, and MySQL, completing two freelance projects and currently building a microservices-based ERP for a café where I also worked for over two years while studying. I enjoy learning new technologies, solving problems, and working in teams. My goal is to grow as a backend developer and contribute to a collaborative development team.

EDUCATION :

**Bachelor's in Systems
Engineering — UNIFRANZ**

2023 - Ongoing

Developing a strong foundation in software engineering, programming with algorithms, databases, and information systems design.

WORK EXPERIENCE

Pharmacy Management and Administration System

Self-employed | 2025

Pharmacy Management and Administration System

- Developed a complete web-based management system for a pharmacy, including inventory tracking, product control, suppliers, sales, and user administration.

Restaurant ERP System (Graduation Project)

Self-employed | 2025

This graduation project is being developed for a café where I previously worked, with the goal of improving its operational management. The system focuses on addressing real business needs such as order processing, inventory management, and workflow optimization, providing a practical solution aligned with the day-to-day operations of the café. It is designed to be scalable and modular, reflecting both the context of a real business and the application of software engineering principles.

SKILLS

Python

Flask

JavaScript

Fast Api
